## Data Management: Innovative Business Intelligence (BI) Project

As an international leader in the wire and cable industry, our client had significant analytical reporting requirements. We turned their long list of requirements into a fully-customized, state-of-the-art business intelligence platform that helped them work smarter, and faster than ever before. | Problem solved.

In business for over 150 years, our client is a leading international provider of wire and cable products for the communications, energy, and electrical markets.

### PROBLEM

Our client was facing multiple challenges:

- **Limited functionality.** Legacy application did not include numerous necessary and desired features.
- **Poor performance, process lag time.** New queries ranged from 2 – 10 working days
- **Confusing configuration and limited accessibility.** Legacy application was only accessible through a limited portal and the system configuration presented unique challenges. In order to achieve a successful query, users had to be extremely knowledgeable about underlying file structure and query construction techniques.

### SOLUTION

consilium1 delivered an innovative and customized BI solution:

- **Re-architected and re-configured data systems.** By redesigning the architecture, c1 was able to streamline and improve the delivery of information.
- **Created custom reporting toolset.** Suite of tools delivered desired functionality.
- **Improved data quality, accuracy, response time, performance, and accessibility.**

### RESULTS

This solution delivered for our client:

- **Desired security, accessibility and connectivity.**
- **Immediate and recurring cost savings.** Client realized immediate Return on Investment (ROI) and continues to enjoy recurring time, support and printing cost savings.
- **Drastic response time improvement.** New query response time reduced from 2 -10 days to around 5 minutes.
- **Real time availability of ad-hoc analysis.**
