Hosting & Cloud Computing: Software as a Service (SaaS) Hosting

While serving a **mission critical** function to school districts nationwide, **our client was having hosting issues**. Simply put, when **they were down**, processes at **their schools were down as well**. They needed someone **who could deliver** guaranteed performance and availability, while providing the **utmost security and manageability**. | **Problem solved.**

For over 16 years, our client has been empowering schools to operate more efficiently and effectively by delivering innovative paperless workflow systems.

PROBLEM

Our client was facing major challenges:

- **Poor performance and availability.** As a complete SaaS model, network performance and availability was critical to our client's success.
- **Security concerns.** Existing hosted solution did not possess our client's desired level of security.
- **Poor accessibility and management capabilities.** Limited accessibility to application made it difficult to perform updates. Network maintenance and monitoring was inefficient and ineffective.

SOLUTION

consilium1 delivered a comprehensive hosting solution:

- **Complete hosting solution.** Including updates, monitoring, patching, domain registration, and bandwidth allocation.
- **High availability through guaranteed service levels.** 99.99% uptime guaranteed to avoid disruption in service.
- **Security and accessibility.** Solution addressed client's needs for high security and accessibility.
- **Dynamic bandwidth allocation to boost service during busy periods of time.**

RESULTS

This solution delivered for our client:

- **Elimination of service issues and improved SaaS delivery.** c1 hosting solution eliminated service disruptions in mission critical processes for our client's end users.
- **Improved connectivity and availability.**
- **Ease-of-use, improved security, improved management, and cost savings.** Application was easier to access, update, and manage in a secure atmosphere, allowing our client to save time and money.
