Collaboration & Messaging:
Exchange Migration & Implementation Project

With **over 26 locations** relying on an **outdated** and **soon to be unsupported Exchange environment**, our **Healthcare client** was **overdue for an upgrade**. c1 was **engaged** for the **great migration** and **brought** them **up to speed** by **designing** and **implementing** a **complete system** that **increased functionality**, **eliminated downtime issues**, and **reduced costs.** | **Problem solved.**

Providing state-of-the-art, compassionate care to more than 1.5 million people in the communities they serve, our integrated healthcare client has been in operation since 1877. Nationally recognized as a leading integrated healthcare network of facilities, our client operates acute and long term care facilities, nursing colleges, physician organizations, charitable foundations, and offers a wide range of home health services.

PROBLEM

Our client was facing multiple challenges:

- **Outdated Exchange environment.** Infrastructure, systems, and applications were all nearing the extreme end of their technological lifecycle.

- **Poor performance and limited functionality.**

- **Interconnected system spread across multiple locations.** Comprehensive and consolidated solution would need to address system requirements across the board.

SOLUTION

consilium1 offered a comprehensive hosting solution that addressed their issues:

- **Re-designed and virtualized environment and infrastructure.** Mapping to best practices and utilizing innovative new technologies, c1 re-designed and updated the overall environment to support the migration and improve performance.

- **Implemented new Exchange system.** New system introduced added functionality and was much easier to manage and support.

- **Successfully migrated mailboxes and associated data across multiple locations.** With no downtime, old data and information was seamlessly transferred into the new system.

RESULTS

This solution delivered multiple results for our client:

- **Increased uptime, functionality, efficiency, and productivity.**

- **Saved 70% in capital expenditures and 30% in operational expenses** through gained efficiencies and reduced support costs.

- **Security and scalability.** Updated, secure foundation offers the ability to easily scale to meet new business requirements.
