Enterprise Application Development & Integration: Multi-Tenant Application Solution

When most people **think** of IT solutions, **creativity** isn't always the **first thing** that **comes to mind**. But when it came to **architecting** a simple, yet **groundbreaking** solution for our Fortune 10 healthcare client, our **creativity and ingenuity led the way**. | **Problem solved.**

Our Healthcare client operates as an intelligent network of solutions that improves clinical communication, accelerates care delivery, and drives cash collection by connecting patients, providers, pharmacies, payors and financial institutions. They possess unique channel strength across key segments and support quality care improvements and reduced administrative costs across the healthcare industry. As a neutral partner, they operate in an open network environment, offering connectivity and interoperability among all organizations, systems and solutions.

PROBLEM

Our client's environment was challenging for the following reasons:

- 150 websites set up primarily to process patient payments and information were created individually as single-tenant instances.
- Due to the single-tenant structure, global web changes were exceedingly **time-consuming**. Any change that needed to be reflected throughout all of the pages needed to be input separately for each individual website.
- Ineffective design necessitated excessive, highly-skilled, and costly support and maintenance resources.
- The on-boarding process for new clients was lengthy and arduous.

SOLUTION

The consilium1 team delivered a groundbreaking and innovative solution:

- c1 created a multi-tenant environment accessible through a single web portal.
- Innovative portal application created an environment where each website could dynamically populate from a stored database. Through the portal, global changes could be instantly implemented and reflected across all sites.
- Easy-to-use portal allowed employees with no web development skills to make secure changes instantly.

RESULTS

Our innovative solution delivered for the client:

- Significantly reduced costs to create, support, and maintain websites.
- Scalable solution could more easily support additional clients and users.
- On-boarding process for new clients transformed from weeks into hours.
- User-friendly portal allowed our client to **re-allocate highly skilled resources to more strategic work.**
