Security & Business Continuity: Disaster Recovery Testing Project

Our **healthcare client** had taken the initiative to create a **Disaster Recovery plan**, but they **needed someone** with **extensive expertise** to evaluate it. After **breaking** it down, we **helped them build it back up**; creating an **intelligent** and **cohesive** plan that **protected their business** along with their **client's information**. | **Problem solved.**

Our client is an independent licensee of a leading international insurance provider. With a network of 39 operating companies across 170 companies, they are among the Top 20 largest employers in the United States.

PROBLEM

Our client was facing multiple challenges:

- **Internal staff had limited experience developing and testing Disaster Recovery (DR) solutions.**
- **Extensive compliance regulations.** As an insurance provider, our client needed to be fully compliant with extensive HIPAA regulations and existing staff had limited experience with regulations in the Disaster Recovery realm.
- **Complex and interconnected data and operations systems.** Inherent complexities added increased difficulty into recovery planning.

SOLUTION

consilium1 leverage their extensive project expertise in their solution:

- **Comprehensive evaluation of overall DR plan.** c1 tested and evaluated each stage of the proposed DR plan from the project goals to the detailed procedures.
- **Identified critical flaws and aided in remediation.** Addressed interconnectivity concerns and revised process to operate more efficiently.
- **Conducted HIPAA compliance gap analysis to identify regulatory flaws and inconsistencies.**
- **Solidified planning framework to eliminate inefficiencies within the system.**

RESULTS

This solution delivered for our client:

- **Comprehensive DR plan.** Mission critical data, processes, and operations were fully recoverable and protected from disaster. Client was able to implement a DR plan that was fully evaluated and proven to be efficient and effective.
- **Full HIPAA compliance.** Patient and proprietary information was safe and recoverable.
- **Security and scalability.** Solid, secure foundation can scale accordingly as additional business components or office locations are added.
