We can do that.

Resourcing & Managed Services:
Outsourced, Onshore Development Project

In many **cases,** the **problems** don't **find** us, we **find the problems**. In the case of **our Fortune 100 Insurance client,** we saw an opportunity to **accelerate** their software development process and **devised** a streamlined plan to **help them** out. They **believed in us**, so we **delivered** for them: **better** work and a 40% **reduction** in project development costs. | **Problem solved.**

Our client is a leading national financial services and insurance provider engaged primarily in specialty property and casualty insurance businesses and in the sale of retirement annuities, life and supplemental health insurance products.

PROBLEM

In an attempt to create a proprietary, integrated document management platform to deliver real-time visibility, institute workflow, and enable collaboration across business divisions, our client faced the following challenges:

- Productivity challenges associated with limited and overworked resources.
- Limited scalability and escalating application development cost.
- Multiple software development firms to manage and accelerating incremental costs.
- No R&D environment to simultaneously develop and incubate new ideas for alternative solutions.

SOLUTION

Identifying these challenges, consilium1 offered a unique, off-site, managed service solution:

- Established accelerated "Boot Camp" program to quickly on-board off-site development team members, allowing them to be immediately productive on the project.
- Rationalized vendors into one consolidated, easy-to-manage team.
- Introduced cloud-based R&D environment that allowed them to incubate and prove new solutions before putting them into production.
- Strengthened build management process for increased success and efficiency.

RESULTS

The c1 team's holistic approach and tailored solution delivered for the client:

- Managed Service approach easily allowed client to scale up or down based on immediate needs and requirements.
- Through the innovative "Boot Camp" approach and offsite delivery team, the client realized a cost savings of 30–40% per hour on development costs.
- Unified approach increased productivity and greatly strengthened overall solution through testing, specialization, collaboration, and dedication.
