Data Center & Networking: Network Upgrade and Consolidation

Our client, an international **injection molding** organization, was growing by **leaps and bounds**. And after a **strategic acquisition** nearly **doubled** their size and **production capacity**, they needed an effective **network upgrade and consolidation, fast**. Within **30 days**, **c1** delivered a **unified solution** that immediately delivered **ROI** and kept their **momentum** going. | **Problem solved.**

Our client is an international injection molding company that specializes in delivering custom solutions in the medical, automotive, alternative energy, telecommunications, electronics, consumer goods, military, and aerospace fields.

PROBLEM

After a strategic acquisition, our client faced multiple challenges:

- Client needed to merge existing security, database, email, and file and print services into a single domain.
- Existing infrastructure in both independent networks was aging and needed to be upgraded.
- Users at remote sites had limited access and functionality with existing systems. Client needed a centralized system that upgraded performance and addressed remote accessibility.
- To maximize productivity, the client needed a solution that could be quickly and easily implemented with no downtime.

SOLUTION

Within 30 days consilium1 had architected and implemented a solution:

- **c1 performed a Business Technology Design (BTD) assessment to gain critical insights about the environment and quickly defined a comprehensive solution.** Insights gained through BTD assessment identified key barriers, infrastructure upgrades and critical components for successful integration.
- **Upgraded infrastructure and consolidated multiple servers and domains.** c1 seamlessly installed new hardware while consolidating and integrating disparate servers, active directory domains and corresponding data obtained through the acquisition.
- **Instituted comprehensive remote access and mobility program.** From any location, users could access critical business applications, network servers, and systems through a high-speed interface.

RESULTS

This solution delivered for our client in several ways:

- **Speed.** c1 was able to seamlessly install, implement, and incorporate the necessary components of the acquisition with no downtime in just 30 days.
- **Productivity.** Unique approach allowed employees to remain highly productive through the merger process. Standardization of infrastructure and applications contributed to a significant increase in productivity once the project was complete.
- **Immediate ROI.** Thoughtful and comprehensive approach, speed of delivery, and integration with no downtime all contributed to an immediate Return on Investment (ROI).
- **Unification.** Centralized applications, structure, and processes allowed employees to begin working as a unified operation, boosting both morale and productivity.
