Enterprise Application Development & Integration: Enterprise Resource Planning (ERP) Project

An international **manufacturing** and **telecommunications** technology company needed a **partner** who knew how to help them **reengineer** their **complex** processes and applications to **improve productivity** throughout the company. Enter **c1** with a **smart** and **comprehensive ERP plan** that **revitalized** the client's **leasing business**, built in efficiency, and **streamlined processes across** the board. | **Problem solved.**

Our client is a global provider of business telecommunications and collaboration software and services. Providing flexibility and simplicity to support today's dynamic work environment, our client delivers a powerful suite of voice, video, and data communication products and capabilities.

PROBLEM

Our client was facing unique challenges that were adversely affecting efficiency:

- **Outdated and unsupported mission critical business applications** needed to be replaced.
- **Disparate systems** throughout the company afforded **limited to no visibility** across company divisions and customer data.
- **Due to expanding needs and limited process and system architecture**, maintenance and support costs were escalating.

SOLUTION

The consilium1 team was able to leverage extensive industry knowledge to provide a unique solution:

- **Solution was led by a detailed assessment and gap analysis.** Insights gained through research helped define a detailed approach to ensure success.
- **In depth evaluation and re-engineering of leasing operations.** c1 explored not only how the leasing operations worked, but how they functioned within the environment through critical business applications.
- **Implementation of common, consolidated, and customized IT solution.** After identifying the barriers, c1 implemented new applications with increased functionality, visibility, and accessibility, on top of a centralized and consolidated platform.

RESULTS

This comprehensive solution delivered for our client in unique ways:

- **Streamlined platform resulted in a 34% cycle time increase** across all critical business processes.
- **Client enjoyed a 20% reduction in infrastructure costs.**
- **Improved access and visibility into projects, customer database, and portfolio management** resulted in significant increases in efficiency, productivity, and profitability.
