

We can do that.

consilium1

Hosting & Cloud Computing: Quick and Flexible Hosting Solution

Our client **needed** a quick and powerful hosting solution but didn't quite know where to start. Within a week, we used our **proven experience** and **expertise** to help them stand up multiple **enterprise** environments that were **not only powerful enough** to deliver on their high availability requirements, but were **uniquely designed to scale** to **exceed** their business needs. | **Problem solved.**

The top U.S. cable television operators came together to revolutionize cable advertising with "advanced interactive advertising" – a product that allows viewers to interact with the 30-second ads they see on TV.

PROBLEM

Our client was facing multiple challenges:

- **Mission critical deadlines and extreme competitive pressure.** Additional project delays would be extremely costly and could jeopardize project launch.
- **Due to comprehensive project requirements, an extremely quick, flexible, and effective approach was needed.** Open Source expertise was also a must.
- **Cost pressures and an imminent deadline were paramount.** A complete solution needed to be ready and available for the development teams as soon as possible to avoid additional costs and delays.

SOLUTION

Within a week, consilium1 delivered an enterprise-ready hosted solution:

- **A flexible, nimble approach.** Unique approach allowed c1 to quickly build, operate, and transfer information.
- **Established a four-tiered hosted solution that incorporated virtualized hardware, Storage Area Networks (SAN) and Network Available Storage (NAS) solutions.**
- **Wiki collaboration site enabled instant project transparency, empowered progress, and established and aided in an effective change control process.**
- **Utility based provisioning provided on-demand scaling capabilities and high availability.**
- **Provided proven and tested operational policies, procedures, along with weekly checkpoints to maintain project progress and meet launch objectives and deadlines.**

RESULTS

This alternative solution delivered for our client in several ways:

- **Established an immediate, flexible enterprise hosting solution.** Quick and successful approach allowed client to optimize progress and deliver to launch expectations.
- **Proprietary, high availability QA and development environments boosted productivity and increased project efficiency.** Teams began "real" work instantly and immediately became productive.
- **Scalable, operational design geared for growth.** Environments were designed to grow with ever changing needs and the solution was built to easily transition into a fully supported, in-house, proprietary data center at the client's discretion.
