Security & Business Continuity: PCI DSS Compliance and Billing Project

Credit Card **security** is a major problem; especially when your **business** depends on it. With **compliance regulations looming**, our client needed some **help securing** their **mission critical** credit card transaction process and **re-engineering** their systems to be **fully** Payment Card Industry Data Security Standard (PCI DSS) compliant. | **Problem solved.**

Our client provides advertising sales and support services to over 200 newspapers throughout the US, accounting for over 50% of circulation in North America.

PROBLEM

Our client was facing mission critical business challenges:

- **Due to the nature of their business, our client functioned solely on credit card transactions.** If they could not securely process credit card transactions, they could not do business.
- **PCI DSS compliance issues.** Due to governmental mandates, our client was required by law to be 100% compliant with PCI DSS regulations.
- **Security concerns.** Our client had millions of credit cards stored in their system.

SOLUTION

consilium1 helped them build a roadmap to PCI DSS compliance:

- **Comprehensive gap analysis.** In accordance with PCI DSS compliance regulations, c1 completed a strategic gap analysis to identify issues and critical flaws in the system.
- **Roadmap to compliance.** After completing the gap analysis, c1 identified all barriers to compliance and proposed resolutions for each issue.
- **Full compliance.** By following the c1 roadmap, our client was able to close the holes in their security system, re-vamp their processes, and function in full compliance with PCI DSS regulations.

RESULTS

This solution delivered for our client in several ways:

- **Easily achieved necessary PCI DSS compliance.** The c1 roadmap made it easy to meet compliance regulations.
- **Improved security measures.** Client information and credit card records were safe.
- **A bright future: safe and secure.** By updating their systems and mapping to proper protocol, our client created a solid foundation that allowed them to move forward safely and securely.
